PURE CANDY!

A. WALTER.

THE LADIES.

MATTERS ESSENTIAL TO PRESENT AND FUTURE HAPPINESS.

The Search for Something to Wear—Tempting the Appetite—Personal Nicknacks.

Breach of promise suits are quite fashionable this season with the fair sex.

The Skye-terrier bang is as popular as ever with both the male and the female duds.

The banquet de corsage is still very popular. A good-sized greenhouse full of roses to a belt is a very popular thing.

A doctor considers tight lacing a public benefit, inasmuch as it kills off the foolish girls and leaves the wise ones to grow into women.

Pocket-books are still carried loosely in the hand, or stuck into a shallow pocket-sneak style being more popular with the sneak-thieves.

Trained dresses are considered very vulgar in the street. The department cleaning made a strong fight in their favor, but it was all to no purpose.

An Eastern metropolitan journal says in relation to latest fashions: A dresy costume for a young lady is a long, full gown of delicately stamped muslin, a cambric blouse of stripes, changeable silk. Floating ribbons from the throat and waist are all the trimming necessary.

Shirted waists, always an ugly fashion, have died a natural death, as so many of the extreme fashions do. They are too loud and obviously in bad taste. The best dressed people never adopt anything so out of the way. There is variety enough nowadays to suit everybody without adopting anything conspicuous or startling.

With the exception of diamonds, both real stones and imitations, which Americans persist in wearing in and out of season, fancy articles both in gold, silver and other metals, made up in a variety of tastefully executed designs, are all the fashion. Arrows, deftly fastened in the hair, are very popular, if they can be called such. A lovely lace pin is made of a golden crescent with a starry diamond, like a drop-down caught just inside.

Bottoms have quite gone out of fashion, and waists are fastened with hooks and eyes and frogs or handsome passementerie ornaments, either the same shade as the dress or a contrasting hue. Plastron is the French name for the larger ornaments, and three of these are usually sufficient. These ornaments are not used for any part of the dress except the corsage. Occasionally braided dresses are seen with the corsage or back even quite elaborately covered with braid.

An effort has been made to introduce puffed sleeves on this dress, particularly for evening wear, particularly for the morning. If the effect is harmonious, a sort of puffed vest might be introduced; the skirt is in puffs—say three large loose ones. Some sleeves are merely puffed on the shoulder, making a much looser sleeve than formerly. In thin goods this is very pretty. In thicker material tight sleeves still prevail, so tight the only wonder is how one ever got them.

Blouse waists are very pretty belted in. A slight figure always looks well in them. For cool days there is a striped woolen and silk goods, called lawn-tennis suitings, which comes in various colors and prints. A blouse sometimes is made of this, with collars and cuffs of plain material, formed of the same goods as the skirt, over which the blouse is looped high. Again, the skirt will be of the stripe, which they now make up both ways, perfectly plain—merely hemmed.

Household Jottings.

Ceilings that have been smoked by a kerosene lamp should be washed off with soda water.

To make corn-starch cake, take three eggs, one cup of sugar, one-half cup of sweet milk, one cup butter, one-half cup of flour, one cup of corn-starch, one tea-spoonful of baking-powder.

A pretty heading for the top of a muslin curtain is made by hemming each edge of a strip of muslin and gathering it in two places so that there shall be a puff in the center and a ruffle on each edge.

For washing hands that have become cracked or blackened, there is nothing better than Indian meal rubbed on with the soap. It not only removes the dirt, but softens and whitens the hands as well. For men or boys doing farm or shop work it is excellent, and should be kept always at hand.

Lace coverlets and pillow covers should not be rinsed in "blue water" when washed, but dipped in very weak, cold coffee. They should be made very wet, wrung very dry with a patent wringer, and dried with the greatest jolts, as otherwise the coffee will seep in, and they will look like a dirty yellow.

A good way to save and use small slices of cold meat is to chop them fine, add some bread crumbs, salt and pepper, and molten with milk, or with gravy or stock. Make this into flat cakes, dip them in egg and fry them until brown, or put the meat in a pudding-dish or basin, press it for two or three hours, and slice it for tea.—[New York Times.]

Ammonia water or a damp cloth dipped in whiting, cleans paint nicely. Sapolio is also good. Cold Tea is the best thing to clean varnished wood with, the tea and tea leaves saved from the table for several days and steeped will usually be sufficient. It removes spots, and gives a much fresher, newer appearance than when soap and water are used.

To make salt fish souffle, wash eight boiled potatoes and mix with a pint of finely chopped salt fish, and add three-fourths of a cup of hot milk, two table-spoonsfuls of butter, a little salt and pepper and two beaten eggs. Bake for ten minutes and then add two more beaten eggs, with which a little salt has been mixed, brown in the oven and serve at once.

The housekeeper who asks for white veal encourages law-breaking and buys poor meat. The whiteness is due simply to the loss of blood, the animal having been bled twenty-four hours before it was killed. Those who do the bleeding, because the meat then fetches a better price; and the people who have a foolish fancy that white veal is the best, are in a way responsible for the brutal process creating it.—[Exchange.]

Unassorted Gossips.

Mrs. Johnstone, the widow of General Albert Sidney Johnstone, and her daughter have left the South to make their home in New York city.

Mrs. Wm. K. Vanderbilt will drive a carriage at Newport. It is a sort of two-wheeled carriage, with a seat and a platform across the horse. It is a dangerous vehicle to drive, but Mrs. Vanderbilt is a capital whip. In fact there are few better horse-women than she in New York. She will be the first of her sex to drive a carriage in America.

An old maid, who recently died in Norway, directed that her estate be equally distributed among six discordant lovers, all of whom were poor, explaining her bequest as follows: "These lovers either courted me for my money, which they now have, or else they loved me, and for that reason they shall have the money, because I believed them."

Mrs. Deborah Powers, of Lansingburg, an aged and wealthy widow, has announced her intention to found a home for aged women, and that to secure this object she has set apart the old homestead of the family, with its surrounding grounds, and will endow it liberally. Mrs. Powers is 93 years of age, but is very active, and takes long walks, going some distance from home unattended to call upon friends.

At Baden-Baden the Empress of Austria rises at 5 o'clock every morning, takes a

little refreshment and then takes an hour's boxing lesson and some gymnastic exercises. After breakfast she makes and receives calls until noon. After lunch she takes a five hours' ride in the saddle and a long walk. Her "ouvrage dinner consists mostly of corned beef and cabbage. At 9 in the evening she goes to bed and sleeps soundly until next morning.

Zulu woman wear as ornaments the bones of various animals, bleached and carved into many a quaint device; the women of Brazil adorn themselves with bugs of vivid hues and skillfully imprisoned within invisible nets brilliant fire-flies, and fasten these among their luxuriant tresses with bewildering effect. In this region a somewhat similar fashion has seized upon the ladies. Bugs, beetles, snakes, and spiders, life-size and as ugly as the originals, are fastened in the hair, on the hats and shoulders of shopkeepers with startling effect.

The New Orleans *Times-Democrat* finds at least one charm in the Southern woman, and that is a low, sweet voice: "A Southern lady, and especially those of Mississippi, have voices so soft, so exquisitely modulated, that hearing them talk is like listening to a sweet melody, to an adagio, it must be confessed, to an adagio, and graciously, as when on earth He taught, His voice shall speak." "I am not so sorry in its tone; Glad presence, walking in the streets of gold!" —Chamberlain.

Deacon Emmons' Experience.

The communion service of January was just over in the church at Sugar Hollow, and people were waiting for Mr. Parkes to give out the hymn, but he did not give it out; he laid his book down on the table and looked about for his church.

He was a man of simplicity and sincerity, full in earnest to do this, his Lord's work, and to do it with all his might, but he did sometimes feel disengaged.

My dearest wife," he said, "you all know that I did not give any notice to that effect that this week is the Week of Prayer. I have a mind to ask you to make it for this once a week of practice instead. Perhaps you will find work that you know not lying in your midst. And let us all on Saturday evening meet here again and choose some brother to relate his experience of the week. You who are willing to try this method, please to."

Everybody rose except Amos Tucker, who never stirred, though his wife pulled at him and whispered to him imploringly. He only shook his grizzled head and sat immovable.

Saturday night the church assembled for services. The cheerful eagerness was gone from their faces; they looked downcast, troubled, weary—as the pastor expected. When the box for ballots was passed about, each one tore a bit of paper from the sheet placed in the hymn-books for the purpose, and wrote on it a name. The pastor said, after he had counted them: "Deacon Emmons, the lot has fallen on me."

"I'm sorry for't" said the deacon, rising up and taking off his overcoat. He had not the best of records, Mr. Parkes, now I tell ye.

"Well, brethren," he said, "I am pretty well ashamed of myself, no doubt, but I ought to be, and may be I shall profit by what I've found out these six days back. I'll tell you just as it comes. Monday I looked about the town, and I found an amazed sort of people, and it ain't good, the doctor says it ain't so, so I thought I'd try on that to begin with. I tell you it come hard. I hankered after that drink of coffee dreadful! Seemed as though I couldn't eat my breakfast without it. I feel a pity to a man that loves liquor, more'n I ever did in my life before; but I feel sure they can stop it if they'll try, for I stopped, and I'm goin' to stay stopped.

"Well, come to dinner, there was another night. I was fast asleep on pine of anything. Our folks always had it three times a day, and the doctor he's been talkin' and talkin' to me about eatin' pine. So I took a trappin' of myself up all day just in the ordinary business, and I was a peg lower down night comin' than I was a day before. I'd rather, as far as the hard work is concerned, lay a mile of four-foot stone-wall than undertake to do a man's living Christian duty for twelve workin' hours. I'll be a good deal better, I think, when I get to the tents of my God, as David says, really cheatin', and cheatin' a woman. I tell ye, brethren, I was all of a sweat. 'Mis' Herrick,' says I, 'I don't know what you're lookin' real close at this goods; I'm not eatin' pine, I'm eatin' pine. So I took a trappin' of myself up all day just in the ordinary business, and I was a peg lower down night comin' than I was a day before. I'd rather, as far as the hard work is concerned, lay a mile of four-foot stone-wall than undertake to do a man's living Christian duty for twelve workin' hours. I'll be a good deal better, I think, when I get to the tents of my God, as David says, really cheatin', and cheatin' a woman. I tell ye, brethren, I was all of a sweat. So I took a trappin' of myself up all day just in the ordinary business, and I was a peg lower down night comin' than I was a day before. I'd rather, as far as the hard work is concerned, lay a mile of four-foot stone-wall than undertake to do a man's living Christian duty for twelve workin' hours. I'll be a good deal better, I think, when I get to the tents of my God, as David says, really cheatin', and cheatin' a woman. I tell ye, brethren, I was all of a sweat. 'Mis' Herrick,' says I, 'I don't know what you're lookin' real close at this goods; I'm not eatin' pine, I'm eatin' pine. So I took a trappin' of myself up all day just in the ordinary business, and I was a peg lower down night comin' than I was a day before. I'd rather, as far as the hard work is concerned, lay a mile of four-foot stone-wall than undertake to do a man's living Christian duty for twelve workin' hours. I'll be a good deal better, I think, when I get to the tents of my God, as David says, really cheatin', and cheatin' a woman. I tell ye, brethren, I was all of a sweat. THE DAILY RECORD-UNION.

SATURDAY.....JULY 28, 1883

HOE PRESS FOR SALE.

We have at the Record-Union office two large double-cylinder Hoe presses, in perfect order, one of which will be sold at a low price, and upon easy terms. The size of bed-plate is 40x60 inches. The purchaser can have his choice of the presses. The object in selling is to replace one of more rapid work.

THIS MORNING'S NEWS.

In New York Government bonds are quoted at \$12 for \$100; \$12½ for \$100; 10½ for \$100; 10 for \$100; 9½ for \$100; 9 for \$100; 8½ for \$100; 8 for \$100; 7½ for \$100; 7 for \$100; 6½ for \$100; 6 for \$100; 5½ for \$100; 5 for \$100; 4½ for \$100; 4 for \$100; 3½ for \$100; 3 for \$100; 2½ for \$100; 2 for \$100; 1½ for \$100; 1 for \$100; ½ for \$100.

Silver in London, 50½ for \$100; consols, 90 for \$100; 85 for \$100; 80 for \$100; 75 for \$100; 70 for \$100; 65 for \$100; 60 for \$100; 55 for \$100; 50 for \$100; 45 for \$100; 40 for \$100; 35 for \$100; 30 for \$100; 25 for \$100; 20 for \$100; 15 for \$100; 10 for \$100; 5 for \$100.

In San Francisco Mexican dollars are quoted at 88½ cents.

There was a decidedly weak feeling in stocks at San Francisco yesterday. Everything called showed a decline from Thursday, varying from 5¢ to 50¢.

Frank Stewart, so terribly injured at Stockton Thursday, died yesterday.

A train near Brownville, Tex., ran over a man and two women, killing one of the women and fatally injuring the man.

Montgomery Blair died yesterday at Silver Spring, Md.

Near Lancaster, Pa., yesterday, an express train struck a wagon containing a man and two women, killing all three.

Tewfik Pasha, Khedive of Egypt, was reported to have been stricken with cholera, but the story turns out to be false.

During the first week in June 1,161 persons died from cholera in Bombay, India.

The American Minister at Constantinople demands the prolongation of the treaty of commerce between Turkey and the United States.

The next National Encampment of the G. A. R. will be held in Minneapolis, Minn.

A serious rupture between Spain and Mexico is threatened.

The leases of grazing lands in Indian Territory are having trouble with each other.

The work of dredging out the Potowmack flats, near Washington, is progressing very slowly.

The body of the late General Ord has been embalmed at Havana, where it will remain until fall, when it will be brought to Washington.

Extinctive forgeries of Dominion notes are reported from Ottawa, Ont.

In a runaway accident near Northeast Harbor, Me., a young lady was instantly killed and several other persons badly injured.

David M. Luke, engineer at the Standard-Bulwer mine in Boyle, met with a frightful death yesterday.

The Japanese Government is to make a fine exhibit of the products of that country at the Boston exhibition.

New York Bay is said to be full of sharks.

All of Cetwayo's wives and many of his chiefs were massacred at the time he was killed.

Dalhousie's peach crop will this year reach an average of 5,000,000 baskets.

Frank Carlson shot his wife in Los Angeles yesterday, and then killed himself.

In a shooting affray at Sidney, Neb., Harry Raynor lost a finger and H. Ricketts was killed.

In San Jose; loss, \$5,000. Also at Denev; loss, \$5,000.

The British steamship Hawke arrived at San Francisco yesterday from Honolulu, where she landed 1,000 emigrants. During the passage 55 children and three women died, and 20 births occurred.

A Chinese highwayman is "practicing his profession" in Stockton.

The charge of assault to murder against ex-County Auditor Wood has been dismissed at Santa Rosa.

Ed. Sheras, who so brutally murdered Martin Knight in Omaha July 5th, has been captured in Minnesota.

The closing exercises of the national encampment of the Grand Army of the Republic took place at Danvers, Mass., last night.

Another train load of Mormons is expected in New York next week, en route to Utah.

Bals fell in Siskiyou county yesterday and Thursday.

Much interesting and valuable reading matter will be found this morning upon the inside pages of the *Record-Union*.

THE WOMAN QUESTION AGAIN.

Dr. William A. Hammond, in the *North American Review*, has an article on "Woman in Politics," which we think is less creditable to his intelligence than to his knowledge as a cultured physician. No one can have any objection to Dr. Hammond expressing his views upon the subject of woman's physiological capability to enter the realm of business or of politics, nor will he find strong exceptions taken to his ideas that woman is better adapted to other spheres of activity than open for her in the political field. But woman may well enter a positive denial, and take issue with Dr. Hammond when he asserts that for anatomical and physiological reasons the progress of the revolution for the improvement of her condition should not only be arrested, but "should be turned backward." Let us briefly examine the doctor's reasons for this positive conclusion. These may be fairly stated in a very brief form.

The brain of man is larger than that of woman. Relatively to the size of body this is not true, he admits, but he holds that the relativity of the question is not to be considered, but the brain quality. It is brain quality that governs in the world, and not brain size. It is this that gives man supremacy over the beasts, and the intellectual man supremacy over the physical giant with a low quality of brain. Thus far, then, we are agreed. The average male brain is about 49 ounces, and the average female brain about 44 ounces in weight. The female brain is not only smaller, but it is different in structure. In man the anterior portion of the brain, in which the highest intellectual faculties reside, is much more developed than in woman, both in size and the convolutions. The part especially concerned in the evolution of mind is the grey matter, constituting the cortex, and this is increased or diminished in accordance with the number and complexity of the convolutions. The frontal portions contain more of the grey matter, and in man these portions are larger than in woman. In man the transverse and vertical measurements of the brain are greater than in woman, and the convolutions are more intricate, and some believe the grey matter to be thicker. But Dr. Hammond is too honest to claim that this has been demonstrated to be a fact. As man has more brain than woman, he has, therefore, more mind; and as the brain of man is more complex, its quality is of a higher order, for the difference of structure involves differences of function. Woman's brain is one from which emotion rather than intellect is evolved. To the preponderance of the emotional is due the fact that woman is less capable of intense abstract thought, and less capable of originating. So it is that woman is imitative and not inventive. She cannot originate, but she can copy well. "No great idea, no great invention, no great discovery in science or art, no great poetical, dramatic or musical composition has ever yet emanated from a woman's brain." There have been a few second-class female painters, and one first-rate female novelist—that's all." On these points we might pause to take issue, but refrain. Again, he proceeds,

as woman cannot reason abstractly, she cannot reason exactly; and as she cannot be exact in most things requiring exactness of statement, life insurance companies decline to insure her. For the same reason woman experiences overwhelming obstacles in the study of mathematics, and the girl who pursues the same course of studies as the male youth suffers from headache and other evidences of cerebral disorder. Even Mrs. Somerville, who wrote on the physical sciences, never reached the grade of original ideation. Woman jumps at conclusions with a wonderful degree of promptness, and reaches the right long before it is attained by the slow processes of reason, but this wonderful and unexplained mental vision, or unconscious cerebration, valuable as it is, will not do to take the place of the judgment, and reason, and coolness necessary in a Governor or a Judge. The hysterical conditions to which all women have been in all time past, disqualify her in emergencies and difficult situations generally, while they are, in their normal condition, the source of some of the loveliest traits of her character. In woman, therefore, there is a potentiality for irregular, illogical, incongruous and altogether inharmonious conduct under circumstances which require the utmost presence of mind and the nicest discretion. Woman judges rather as she feels than as she thinks, and is wanting in that type of mental organization known as the "judicial mind."

These are, then, the reasons which move the doctor to his remarkable conclusion. We say remarkable, because we do not believe it accords with the history of the race, nor is it supported by his own line of argument. And this, because the doctor has misconceived the whole object and purpose of the "woman movement," so called, of modern days. We may admit most that he advances, and there is but little that is not fairly stated, and still deny the correctness of his conclusion. No one has contended that in vesting women with equal political rights and a voice as men it should be based upon her equality in mental power. The very fact that she is mentally and physically the weaker vessel, may be claimed as sufficient reason for arming her with all the social and legal weapons of self-defense. It is by no means necessary to contend that she is man's intellectual equal. It matters very little, if at all, whether the grey matter is less in quantity in her brain, or of coarser grain. The question is, "Is she, as a human being, entitled to like protection with man?" Beyond that it is wholly unnecessary to go. No one desires to invest her with rights she cannot exercise or enjoy. No one proposes, or has proposed, to place her in stations she is unfit to occupy. The evolution of the excellent and the rejection of the inadequate and unfit will exclude her from all walks she can't pursue and all responsibilities she cannot assume. What is contended is that whatever good qualities she possesses which will contribute to the advance of the race, the perfection of systems and forms of government, shall be availed of by society, and not excluded because the possessor is not the weaker sex. The doctor, like many another well-meaning opponent for coeducation of the sexes and political equality, misconceives the text. It does not follow that because woman should be vested with certain rights she must, perforce, rule in political life. So far as she can prevail, we hold it right that she should. If she is unsuited to the political realm, no grant of privilege can keep her in it. Give her the opportunity and, whatever her destiny, it will be worked out. Whatever she may prove equal to, she should be privileged in. We have never yet read or heard an argument of force against the opening of opportunity to this class of human beings. On the contrary, the evolution of the excellent and the rejection of the inadequate and unfit will exclude her from all walks she can't pursue and all responsibilities she cannot assume. What is contended is that whatever good qualities she possesses which will contribute to the advance of the race, the perfection of systems and forms of government, shall be availed of by society, and not excluded because the possessor is not the weaker sex. The doctor, like many another well-meaning opponent for coeducation of the sexes and political equality, misconceives the text. If she is unsuited to the political realm, no grant of privilege can keep her in it. Give her the opportunity and, whatever her destiny, it will be worked out. Whatever she may prove equal to, she should be privileged in. We have never yet read or heard an argument of force against the opening of opportunity to this class of human beings. On the contrary, the evolution of the excellent and the rejection of the inadequate and unfit will exclude her from all walks she can't pursue and all responsibilities she cannot assume. What is contended is that whatever good qualities she possesses which will contribute to the advance of the race, the perfection of systems and forms of government, shall be availed of by society, and not excluded because the possessor is not the weaker sex. The doctor, like many another well-meaning opponent for coeducation of the sexes and political equality, misconceives the text. It does not follow that because woman should be vested with certain rights she must, perforce, rule in political life. So far as she can prevail, we hold it right that she should. If she is unsuited to the political realm, no grant of privilege can keep her in it. Give her the opportunity and, whatever her destiny, it will be worked out. PACIFIC SLOPE.

Disease and Death on an Emigrant Ship—A Chinese Highwayman—Small Fire in San Jose—Frightful Death of an Engineer—The Lexington Murderers—Tragedy in Los Angeles—Etc.

[SPECIAL DISPATCHES TO THE RECORD-UNION.]

CALIFORNIA.

Morors of an Emigrant Ship—End of a strike.

SAN FRANCISCO, July 27th.—The British steamer "Hawke" arrived yesterday from Honolulu, where she arrived July 7th from Azores with fifteen hundred emigrants. During the passage measles and whooping cough broke out on board, carrying off fifty-five children. Three women died from other diseases, and there were four cases of smallpox.

The company strike has ended, the employers according to the strikers' terms.

State Board of Horticulture—Change in Presidency.

SAN FRANCISCO, July 27th.—A meeting of the State Board of Horticulture was held here to-day, when Mr. Boggs resigned the Presidency. The Board, however, was elected to that position. Mr. Boggs made a short speech, in which he said that his resignation was not on account of any ill-feelings, but that having been appointed Inspector of Fruit Pests, he soon found that he could not qualify for the position. He said that he had no means of means and could not afford to pay traveling expenses without remuneration, and it was quite likely he should therefore soon leave the Board altogether.

Died of His Injuries.

STOCKTON, July 27th.—Frank Stewart, whose thigh was terribly mangled yesterday by being struck in the head by a rock thrown by a railroad flat car loaded with wheat, died at 9:40 A. M., to-day. Mr. Stewart was a native of Tennessee, aged 53 years. He was a veteran of the Mexican war, and a California pioneer. He was a member of the firm of Stewart & Son, the great lumbermen of this city, also President of the First National Bank of Stockton. His fortune is estimated at not less than \$600,000.

"John" in the Role of a Highwayman.

STOCKTON, July 27th.—Alexander Selkirk, a horse breeder, was stopped about half a mile outside the city limits last night by a Chinese highwayman, who took his money and pistol, and fled.

He was severely injured, and in an endeavor to arrest the wounded was stabbed in the breast. The knife struck a rib and glanced, the point coming out four inches from where it entered. It is a flesh-wound, and not necessarily dangerous.

A horrible Death in Bodie.

BODIE, July 27th.—A boy, John Gandy, son of Jim Gandy, engine-driver at the Standard-Bulwer mine, was instantly killed. In coming up through the trap-door in the floor of the engine-room he slipped, and the crank of the engine caught him, pounding him on the floor at each revolution, breaking his bones and tearing his head and other vital parts out of his body. Local men widely known and highly respected, who was a native of New York, 36 years old, a Mason of high standing, and a member of Bodie Commandery, Knights Templars.

Fires in San Jose. The Lexington Mur-

derers—San Jose, July 27th.—A fire caught in the roof of L. Leon's mansion on Second street at 12:45 to-day, but was extinguished before much of the building had been burned. The house was drenched with water, and the ceilings, carpets and furniture badly damaged. The loss is about \$3,000; covered by insurance.

Joseph Jewell, the reprieved murderer, refuses to eat jail fare, and for the past two days has been moping and crying. He cannot read, as his cell is kept locked all the time, on account of the difficulty of his picture taken by Major his associate crime, will be brought before Judge Belden to-day, when his case will set for examination.

Verdict of Acquittal.

SANTA ROSA, July 27th.—In the case of Ben Wood, County Auditor, on a charge of assault and intent to murder, before Superior Judge Tressel, the jury this evening, in less than five minutes, returned a verdict of acquittal.

Rain in Shasta.

YERCA, July 27th.—Another thunder shower occurred this afternoon, with more rain than yesterday, cooling the atmosphere, but not enough to quench the forest fires.

Tragedy in Los Angeles.

LOS ANGELES, July 27th.—This afternoon Frank Carloni, an Italian, aged 26 years, shot his wife in the region of the right groin, but not inflicting a fatal wound, and placing the pistol to his own head, instead killed himself. He was a recent recruit in the employ of A. Vizcaya, on First street. The wounded wife says that just previous to the shooting the husband drank heavily of whisky. There are rumors of family trouble and jealousy.

Arizona.

Apache Repressions in Sonora.

TUCSON, July 27th.—Following is a summary of the Apache doings in Sonora, as gathered from *El Fronterizo*. A correspondent from Bavispa, under date of July 11th, says: Day after day we hear of Apache depredations in this neighborhood. Within the short period of a week, we have seen three such cases. By to-day's mail we have news of their killing seven men on the 6th and 7th instants. A letter from Fronterizo says, under date of July 12th: "Our troubles seem to have no end, to-day, to our picture taken by Major his associate crime, will be brought before Judge Belden to-day, when his case will set for examination.
